REPORTS ON THE ANNUAL CENSUS OF MANUFACTURES

This report is one of the general, or all-industry, series presenting the results of the annual Census of Manufactures. The complete general series, containing principal statistics on individual industries and industry groups for all of Canada or its various geographical subdivisions, is as follows:

| Catalogue number - Numéro de catalogue | Title |
|---|--|
| 31-201 | General Review of the Manufacturing Industries of Canada |
| | Manufacturing Industries of Canada: |
| 31-203 | Section A - Summary for Canada |
| 31-204 | B - Atlantic Provinces |
| 31-205 | C - Quebec |
| 31-206 | D - Ontario |
| 31-207 | E - Prairie Provinces |
| 31-208 | F - British Columbia, Yukon and Northwest Territories |
| 31-209 | G - Geographical Distribution(1) |
| 31-210 | H - Type of Organization and Size of Establishments |
| 31-211 | Products Shipped by Canadian Manufacturers |

(1) Principal statistics of industries for census divisions or counties and municipalities.

With the exception of "Products Shipped by Canadian Manufacturers", Catalogue No. 31-211, all of the general reports are published in English and French.

In addition to these general reports, there are some 135 annual reports on individual industries based on the Census of Manufactures. These reports contain quantities and values of products shipped by the individual industry (published earlier than in the comprehensive report, "Products Shipped by Canadian Manufacturers", listed above), materials used, breakdowns by size of establishment, lists (for most industries) of establishments and other detail not given elsewhere. A list of these industry reports may be obtained by requesting the Bureau's Subscription Order Form, available without charge from the Information Division, Dominion Bureau of Statistics, Ottawa, Ontario.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

RAPPORTS CONCERNANT LE RECENSEMENT ANNUEL DES MANUFACTURES

Le présent rapport fait partie de la série générale qui s'applique à toutes les industries et qui donne les résultats du Recensement annuel des manufactures. Voici la série générale complète contenant les principales statistiques sur chaque industrie en particulier et sur les groupes d'industries au Canada entier ou dans ses différentes subdivisions géographiques:

| Catalogue number - Numéro de catalogue | Title |

| 31-209 | G - Répartition géographique(1) |
| 31-210 | H - Forme d'organisation et taille des établissements |
| 31-211 | Products Shipped by Canadian Manufacturers |

(1) Principales statistiques sur les industries par division de recensement ou par comté et municipalité.

A l'exception de Products Shipped by Canadian Manufacturers (numéro de catalogue 31-211), tous les rapports de la série générale paraissent en anglais et en français.

En plus des rapports généraux, il y a quelques 135 rapports sur des industries particulières tirés du Recensement annuel des manufactures. Ils contiennent les données suivantes: quantité et valeur des produits expédiés par une industrie particulière (ainsi, ces renseignements paraissent plus tôt que le rapport plus détaillé intitulé Products Shipped by Canadian Manufacturers et indiqué ci-dessus) matières utilisées, répartitions suivant l'importance de l'établissement, listes des établissements (ceci s'applique à la plupart des industries) et autres détails qui ne paraissent nulle part ailleurs. On peut obtenir un répertoire de ces rapports industriels en demandant le "Bulletin d'abonnement", offert gratuitement par la Division de l'information, Bureau fédéral de la statistique, Ottawa, Ontario.

INTRODUCTION

More Recent Data

1967 aggregate statistics on the manufacturing industries for small areas are available in the preliminary bulletins "Manufacturing Industries - Geographical Distribution, Counties or Census Divisions" (Catalogue No. 31-209-P-1), and "Manufacturing Industries - Geographical Distribution, Selected Municipalities and Census Metropolitan Areas" (Catalogue No. 31-209-P-2).

Changes from Previous Issues

Changes from the 1965 issue consist in publishing, for the first time, stratified employment and shipments data for Census Metropolitan Areas and specified municipalities, as shown in Tables 13-16.

Notes on "Concepts and Definitions" omitted from this report for reasons of economy may be obtained from the Manufacturing and Primary Industries Division of the Bureau upon request. These are essentially the same as those published in 1965 reports of this series, but do record the introduction, beginning with the 1966 Census, of use of the same reporting year for all employee data as for other data. Previously, respondents basing their returns on a financial year differing from the calendar year were requested to report employee data for the calendar year (the preferred period for all data under both sets of reporting instructions).

While changes between the 1965 and 1966 issues are relatively minor, those between the 1961 and 1965 issues were more significant. For a summary of the features of these changes, in particular those relating to "Total activity statistics", "Manufacturing activity statistics", "Employment concept", and "Revisions to 1961 data", please see the introduction to the 1964 issue.

Use of Computer Print-out

The introduction of computer processing, beginning with the 1961 Census of Manufactures, has made more readily available a greatly extended range of detailed statistics and has made possible the direct photographic reproduction of many of the tables in this report from computer print-out. The preparation of tables by computer, however, has involved certain changes in the sequence and identifying detail of industry groups and individual industries:

(a) In tables which provide data by industry group, groups classified as producing durable goods are listed first, followed by those classified as producing non-durable goods. However, within these two categories, the groups are still listed in the order in which they occur in the Standard Industrial Classification:

Durable goods-producing industry groups

- Wood industries
- Furniture and fixture industries
- Primary metal industries
- Metal fabricating industries
- Machinery industries
- Transportation equipment industries
- Electrical products industries
- Non-metallic mineral products industries

Données plus récentes

Les bulletins provisoires "Industries manufacturières - Répartition géographique, comtés ou divisions de recensement" (numéro de catalogue 31-209-P-1) et "Industries manufacturières - Répartition géographique, quelques municipalités et zones métropolitaines de recensement" (numéro de catalogue 31-209-P-2) présentent des statistiques agrégatives de 1967 sur les industries manufacturières pour les petites régions.

Modifications par rapport aux éditions précédentes

Pour la première fois, sont publiées cette année des données stratifiées sur l'emploi et les expéditions, par zone métropolitaine de recensement et selon certaines municipalités (Tableaux 13 à 16).

Les notes concernant les "Concepts et définitions", qui n'ont pas été reproduites ici pour des raisons d'économie, peuvent être obtenues de la Division des industries manufacturières et primaires du Bureau sur simple demande. Ces notes sont sensiblement identiques à celles que contenait la série correspondante de publications pour 1965, sauf qu'à partir du recensement des manufactures de 1966, tous les renseignements concernant le personnel sont déclarés pour la même période que les autres données. Auparavant, les sociétés dont les déclarations se rapportaient à une année financière différente de l'année civile devaient déclarer les renseignements concernant leur personnel sur la base de l'année civile. (Il reste toujours préférable que les déclarations soient faites sur la base de l'année civile).

Si les modifications apportées pour 1966 par rapport à 1965 sont relativement minimes, celles qui différencient l'édition de 1961 de celle de 1965 sont plus appréciables. Les caractéristiques de ces modifications, en particulier en ce qui concerne la "Statistique de l'activité totale", la "Statistique de l'activité manufacturière", le "Concept de l'emploi", et les "Rectifications des données de 1961", sont résumées dans l'introduction à l'édition de 1964, à laquelle on est prié de se reporter.

Utilisation d'états mécanographiques

L'utilisation du traitement électronique des données, à compter du recensement des manufactures de 1961, a permis de présenter une gamme beaucoup plus vaste de statistiques détaillées et a rendu possible la reproduction photographique direct d'un bon nombre des tableaux du présent rapport à partir d'états mécanographiques. La préparation électronique des tableaux a néanmoins nécessité certains changements dans la disposition et la désignation des groupes d'industries et des industries considérées individuellement:

a) Dans les tableaux où figurent des données réparties par groupe d'industries, les groupes classés comme producteurs de biens durables précèdent ceux des producteurs de biens non-durables. Dans ces catégories, toutefois, les groupes sont toujours disposés suivant le même ordre que dans la Classification type des industries:

Groupe d'industries, producteurs de biens durables

- Industrie du bois
- Industrie du meuble et des articles d'ameublement
- Industrie métallique primaire
- Industrie des produits métalliques
- Industrie de la machinerie
- Industrie du matériel de transport
- Industrie des appareils et du matériel électriques
- Industrie des produits minéraux non métalliques

Non-durable goods-producing industry groups

Food and beverage industries
Tobacco products industries
Rubber industries
Leather industries
Textile industries
Knitting mills
Clothing industries
Paper and allied industries
Printing, publishing and allied industries
Petroleum and coal products industries
Chemical and chemical products industries
Miscellaneous manufacturing industries

(b) An identifying Standard Industrial Classification code precedes the industry name in all tables showing individual industry data, and an identifying major group code precedes the industry group name in all tables showing major industry group data. Because of space limitation caused by longer French names, these identifying code numbers appear only with English industry name.

(c) Industry names have been confined to one line, necessitating abbreviations in some cases.

(d) It has been necessary to omit accents from French words.

Municipality

The term "municipality", as used in this report, includes incorporated cities, towns and villages, as well as other organized areas such as townships, parishes or district municipalities.

The differentiation between urban and rural municipalities was discontinued in the 1965 issue, since it had become a somewhat misleading designation as an indicator of the degree of industrialization. For example, highly industrialized municipalities, such as Etobicoke Township, Ontario, and the District Municipality of Burnaby, B.C. are, for some purposes, designated "rural" municipalities.

"Other Industries" and "Other Major Groups" Categories

These categories are not part of the Standard Industrial Classification. Rather, they contain the residual of industries or industry groups, as the case may be, which cannot be published because of the secrecy provisions of the Statistics Act. It is important to realize that the content of these categories is not constant. To illustrate, in a given municipality the "Other Industries" for major group 9 "Furniture and fixture industries" might consist of S.I.C. 264 "Office furniture industry" and of S.I.C. 266 "Other furniture industries", while in another municipality the residual might consist of S.I.C. 261 "Household furniture industry" and S.I.C. 268 "Electric lamp and shade industry". Furthermore, the content of the "residual" might not only vary between municipalities, but also for the same municipality for different years.

Confidentiality of Data

The Dominion Bureau of Statistics is prohibited by law from publishing any statistics which would divulge information relating to an individual company without the previous consent in writing of that company. In practice, this means that no data except for number, type and location of establishments are shown for industrial or geographic aggregations composed of fewer than three establishments, or of three or more

Groupes d'industries, producteurs de biens non-durables

Industrie des aliments et boissons
Industrie du tabac
Industrie du caoutchouc
Industrie du cuir
Industrie textile
Bonneterie
Industrie du vêtement
Industrie du papier et produits connexes
Imprimerie, édition et industries connexes
Industrie des dérivés du pétrole et du charbon
Industrie chimique et des produits connexes
Industries manufacturières diverses

b) Dans tous les tableaux qui donnent les résultats d'industries individuelles, un code d'identification tiré de la Classification type des industries figure devant la désignation de l'industrie, et dans tous les tableaux qui donnent les résultats par groupe d'industries un numéro de groupe d'industries figure devant la désignation de chaque groupe. En raison du manque de place imposé par l'utilisation de désignations en français, ces numéros de code ne figurent qu'en face des désignations anglaises.

c) On n'a pu consacrer qu'une seule ligne à la désignation des industries, qui ont donc dû être abrégées dans certains cas.

d) Il a fallu omettre les accents sur les mots français.

Municipalité

Le terme "municipalité" dans le présent rapport s'applique aux cités, villes et villages constitués, ainsi qu'à d'autres régions organisées, tels que cantons, paroisses ou municipalités de district.

La différenciation entre les municipalités urbaines et rurales a été abandonnée dans l'édition de 1965, car elle prêtait à malentendu en tant qu'indicateur du degré d'industrialisation. Par exemple, des municipalités fortement industrialisées, telles que le canton d'Etobicoke, en Ontario, et la municipalité de district de Burnaby, en Colombie-Britannique, sont, pour certains besoins, tous deux désignés comme municipalités "rurales".

Catégories des "Autres industries" et "Autres groupes principaux"

Ces catégories ne figurent pas dans la Classification type des industries. On y a plutôt inclus le reliquat d'industries ou de groupes d'industries selon le cas, qui ne pouvait être publié en vertu des dispositions de la Loi sur la statistique relatives au secret. Il faut bien noter que le contenu de ces catégories n'est pas constant. Ainsi, dans une municipalité donnée, les "Autres industries" du groupe principal n° 9 "Industrie du meuble et des articles d'ameublement" pourraient comprendre les rubriques de la C.T.I. n° 264 "Industrie des meubles de bureau" et 266 "Autres industries du meuble", alors que dans une autre municipalité, le reliquat pourrait être composé des rubriques de la C.T.I. n° 261 "Industrie des meubles de maison" et 268 "Industrie des lampes électriques et des abat-jour". D'autre part, non seulement le "reliquat" peut varier d'une municipalité à l'autre, mais encore à l'intérieur d'une même municipalité d'une année à l'autre.

Secret statistique

Aux termes de la loi, le Bureau fédéral de la statistique ne peut publier aucune statistique entraînant la divulgation de renseignements sur une société individuelle sans l'autorisation écrite préalable de la dite société. En pratique, cela signifie qu'aucune donnée, à l'exception du nombre, du type et de l'adresse des établissements n'est publiée à l'égard des agrégats industriels ou géographiques comportant moins de trois établissements, ou trois établissements et plus

if these are dominated by one or two establishments or companies.

In order to provide a systematic publication pattern which will prevent indirect (or residual) disclosure, choices must often be made between the publication or suppression of different levels of industrial or geographic data. Such decisions are made in accordance with an order of precedence designed to provide as detailed data as possible consistent with provisions of the Statistics Act and requirements for industrial and regional analysis.

For individual industries, industry groups, and all-industry totals, Canada is given preference over provinces, provinces over counties or census division and counties or census divisions over municipalities. Similarly, in tables showing industry detail, all-industry totals take precedence over two-digit industry groups, and industry groups over their component three and four-digit industries. The major exception to the practice of giving preference to higher levels of geographic aggregation is Census Metropolitan Areas, where individual industries and industry groups have been given preference over those in the counties or census divisions in which they are located, as well as over those of their component municipalities.

Head Offices, Sales Offices and Auxiliary Units

The statistical treatment of head offices, sales offices and auxiliary units, is concerned primarily with individual industries and industry groups at the provincial and national levels. Additional factors must be considered when data for such reporting units are compiled at the sub-provincial level.

At the provincial level, statistics of the manufacturing industries are considered to be consistent for practical purposes despite occasional minor distortions introduced by the inclusion of separate head and auxiliary offices in the totals. At the county and municipal level, however, the effects of such inclusions are considered serious enough to warrant special treatment. For example, since head offices of large multi-unit firms with Canada-wide operations tend to be located in the large metropolitan areas such as Toronto and Montreal, industry statistics for these centres would be overloaded with expenses relative to revenue and thus would distort inter-city or inter-area comparisons of manufacturing activity.

In order to avoid such distortions, the basic tables on geographic or location statistics (counties, Census Metropolitan Areas and municipalities) are confined to the principal statistics of establishments which exclude separately located head and auxiliary offices. Head offices of single-establishment firms that are located elsewhere than in the same municipality as the manufacturing establishment, and most head offices of multi-establishment firms, are asked to submit separate "head office" reports. These head offices, as well as establishments showing, on their reports, employment at other locations, are asked to report employment and payrolls, by location, of any auxiliary employing 15 or more persons. These data are then given appropriate geographic codes and tabulated separately along with the main head office and other auxiliary units that have submitted separate "head office" reports. Those auxiliary offices that employ fewer than 15 persons are left in the establishment or head office returns on which they were reported as it would not be practicable to ask for separate location listings of all auxiliary units that employ small numbers of workers.

Publishable data on employment and payroll of head offices, sales offices and auxiliary units are

lorsqu'il existe une prédominance d'un ou de deux établissements ou sociétés.

Dans le but d'établir un schéma systématique de publication empêchant la divulgation indirecte par recoupement, il faut souvent choisir entre la publication ou la suppression des données à un certain niveau de division industrielle ou géographique. La décision de ce choix tient compte d'un ordre de priorité conçu pour permettre de fournir des statistiques aussi détaillées que possible dans le cadre des dispositions de la Loi sur la statistique tout en répondant aux exigences de l'analyse par industrie et par région.

En ce qui concerne les industries, les groupes d'industries et l'ensemble des industries, le Canada a la priorité sur les provinces, les provinces sur les comtés ou divisions de recensement, et les comtés ou divisions de recensement sur les municipalités. De la même manière, dans les tableaux détaillés par industrie, le total de l'ensemble des industries a la priorité sur celui du groupe d'industries à deux chiffres et le total du groupe d'industries a priorité sur les totaux des industries à trois ou à quatre chiffres qui les composent. On déroge surtout à la règle qui consiste à accorder la priorité à l'ensemble géographique supérieur dans le cas des zones métropolitaines de recensement qui prennent le pas sur le comté ou la division de recensement où se trouve l'industrie considérée, ainsi que sur les municipalités qui font partie de cette zone.

Sièges sociaux, bureaux de vente et unités auxiliaires

Le traitement statistique des sièges sociaux, des bureaux de vente et des unités auxiliaires, vise avant tout les industries particulières et les groupes d'industries aux niveaux provincial et national. Il faut tenir compte d'autres facteurs quand on réunit au niveau intraprovincial les données de ces unités déclarantes.

Au niveau provincial, on estime que la statistique des industries manufacturières est, en pratique, cohérente, malgré de légères déformations occasionnelles dues à l'inclusion dans le total des chiffres de sièges sociaux et de bureaux auxiliaires distincts. Au niveau des comtés et des municipalités, toutefois, les incidences de ces inclusions sont jugées assez importantes pour motiver un traitement particulier. Par exemple, comme le siège des grandes entreprises à établissements multiples dont les activités s'étendent au Canada tout entier est d'ordinaire situé dans les grandes zones métropolitaines, comme Montréal et Toronto, la statistique industrielle de ces centres révélerait beaucoup plus de dépenses que de recettes, ce qui fausserait les comparaisons d'activité manufacturière entre les cités ou entre les régions.

Pour éviter cette distorsion, les tableaux fondamentaux de statistiques géographiques (comtés, zones métropolitaines de recensement et municipalités) s'en tiennent aux statistiques principales des établissements et ne comprennent pas les statistiques des sièges sociaux et des bureaux auxiliaires situés dans des municipalités différentes. Les sièges sociaux d'entreprises à établissement unique qui ne sont pas situés dans la même municipalité que l'établissement manufacturier et la plupart des sièges sociaux des entreprises à établissements multiples doivent remplir des déclarations distinctes de "siège social". Ces sièges sociaux, de même que les établissements qui déclarent avoir des employés ailleurs, doivent déclarer le nombre d'employés et la rémunération, par endroit, de toute unité auxiliaire employant 15 personnes ou plus. Les déclarations de ces unités sont marquées du numéro de code géographique approprié et dépouillées séparément en même temps que celles des sièges sociaux et des autres unités auxiliaires qui ont présenté des déclarations distinctes de "siège social". Les données concernant les bureaux auxiliaires employant moins de 15 personnes continuent d'être comprises dans les déclarations des établissements ou des sièges sociaux dont ils relèvent, étant donné qu'il serait peu pratique d'exiger des déclarations distinctes pour chaque unité auxiliaire qui n'emploie qu'un petit nombre de travailleurs.

Les données publiables sur l'emploi et les rémunérations dans les sièges sociaux, les bureaux de vente et les unités

shown for counties or census divisions, Census Metropolitan Areas and cities in Tables 10, 11 and 12, respectively.

Unpublished Small Areas Statistics

In addition to data published in this report, information could be made available, for a charge, on a special request basis for the following items:

- 1- The number of establishments in confidential industries, by Census Metropolitan Area, county or census division, and municipality;
- 2- Industry and industry group data for the ten economic regions of Ontario.
- 3- 1961 Census Metropolitan Areas data, by industry group and industry, incorporating the "total activity" and establishment definitions used at present.

EXPLANATORY NOTES ON INDIVIDUAL TABLES

To facilitate the use of the data shown in this publication, the following explanations relating to specified individual tables are provided.

Table 4. Municipalities by Province

This table is probably the most convenient one to use in order to obtain "all-industry" manufacturing totals for a particular municipality and for only one year, 1966. The arrangement, by provinces ranged from east to west, and by municipalities alphabetically arranged within each province, is the same as in previous issues of this report.

There are, of course, many municipalities for which data cannot be published without substantially revealing the operations of one or two establishments; such municipalities having three or more establishments are listed in Appendix I.

The municipalities included in Table 4 are identical with those shown in Tables 5 and 6.

Table 5. Municipalities Ranked by Shipments

There are two very important qualifications which should be kept in mind when using this table:

1. It includes only those municipalities for which data can be published;
2. It ranks the municipalities by only one criterion—value of shipments of goods of own manufacture.

Because of the obvious limitations which these two qualifications impose, it is necessary to use a certain amount of caution in drawing conclusions about the importance of a given municipality as a manufacturing centre. It cannot be determined with any degree of assurance that a municipality ranks 10th, 20th, or any other place, as one or more unpublished municipalities may, in fact, have larger shipments than the one under consideration. For this reason, numerical rankings have been intentionally omitted from the table.

Equally important, a municipality which has a certain rank on the basis of value of shipments may rank higher or lower on the basis of other criteria such as value added, employment, or salaries and wages paid.

auxiliaires, réparties par comté ou division de recensement, zone métropolitaine de recensement et cité, paraissent aux Tableaux 10, 11 et 12 respectivement.

Statistiques non publiées pour les petites régions

En plus des renseignements publiés dans le présent rapport, les renseignements suivants pourraient être fournis à titre onéreux et sur demande spéciale:

- 1- Nombre d'établissements des industries pour lesquelles les données sont confidentielles, par zone métropolitaine de recensement, comté ou division de recensement, et par municipalité;
- 2- Données sur les industries et groupes d'industries pour les dix régions économiques de l'Ontario.
- 3- Données de 1961 pour les zones métropolitaines de recensement par groupe d'industries et industrie, fusionnant les définitions de l'activité totale et de l'établissement utilisées actuellement.

NOTES EXPLICATIVES SUR CERTAINS TABLEAUX

Les explications ci-dessous se rapportant aux tableaux spécifiques sont destinées à faciliter l'utilisation des données que contient la présente publication.

Tableau 4. Municipalités par province

Ce tableau est probablement celui qui se prête le plus commodément à l'obtention de l'activité manufacturière totale "toutes industries" pour une municipalité donnée et pour la seule année 1966. La présentation par provinces classées de l'est à l'ouest, et par municipalités dans l'ordre alphabétique à l'intérieur de chaque province, est identique à celle qui avait été adoptée dans les éditions précédentes de ce rapport.

Il existe, bien entendu, un grand nombre de municipalités pour lesquelles les données ne peuvent être publiées sans révéler une bonne partie des activités d'un ou de deux établissements; la liste de telles municipalités qui comprennent trois établissements ou plus figure à l'Annexe I.

Les municipalités qui figurent au Tableau 4 sont les mêmes que celles des Tableaux 5 et 6.

Tableau 5. Municipalités classées selon les expéditions

Il y a deux points importants à signaler au sujet de ce tableau:

1. Il ne comprend que les municipalités sur lesquelles on peut publier des données;
2. Les municipalités n'y sont classées que selon un seul critère: la valeur des expéditions de marchandises produites à la fabrique.

En raison des limitations évidentes qu'imposent ces deux critères, les conclusions tirées quant à l'importance d'une municipalité comme centre manufacturier sont sujettes à caution. Il est impossible, à partir de ce tableau, de savoir si une municipalité se classe au 10^e, au 20^e ou à un autre rang, puisqu'il peut se trouver d'autres municipalités non inscrites dont les expéditions soient plus importantes. C'est pour cette raison qu'on a délibérément omis le classement numérique dans ce tableau.

Il est également important de se rappeler qu'une municipalité qui occupe un certain rang fondé sur la valeur des expéditions peut occuper un autre rang si l'on utilise d'autres critères, comme la valeur ajoutée, le nombre d'employés ou les traitements et salaires versés.

Despite these limitations, the table can serve as a general guide to the relative importance of various municipalities and provides, in expanded coverage, data comparable to those in previous reports.

Table 6. Counties or Census Divisions, by Municipality

Beginning with the 1965 issue, this table has changed from previous reports in that the urban-rural separation has been eliminated (see page vi of the "Introduction").

Data for head offices, sales offices, etc. and for the province as a whole are published at the end of each provincial section of the table.

Finally, municipalities for each county or census division are, in most cases, not listed in alphabetical sequence.

Table 7. Counties or Census Divisions, by Industry Group and Industry

This is the most comprehensive table in this report, showing industry group and industry detail, as well as the aggregate total for each county or census division, if publishable under the secrecy provisions of the Statistics Act.

Table 8. Census Metropolitan Areas, by Industry Group and Industry

Beginning with 1966, the cities of Regina and Saskatoon were classified as Census Metropolitan Areas and are, therefore, included in Table 8 for the first time.

The Census Metropolitan Area data are compiled on the basis of the respective 1966 boundary definition which, however, remained relatively unchanged from the 1961 delineation.

The 18 Census Metropolitan Areas, for which data can be published, are arranged in alphabetical order within Canada.

Table 9. Municipalities with Shipments of Goods of Own Manufacture of \$10,000,000 or More, by Province, Industry Group and Industry

As already explained on page vi of the "Introduction", this table includes all publishable municipalities, alphabetically arranged within province, with shipments of goods of own manufacture of \$10,000,000 or more, regardless of the legal status of incorporation.

Component cities of Census Metropolitan Areas are included in the table, but in order to ensure maximum publishability of individual industries for the Census Metropolitan Areas, no industry detail has been shown for component cities. However, industry detail has been published for other cities wherever possible.

Malgré ces limitations le tableau peut servir à indiquer en gros l'importance relative des différentes municipalités et donne, en une plus grande étendue, des renseignements comparables avec ceux des rapports précédents.

Tableau 6. Comtés ou divisions de recensement, par municipalité

A partir de 1965, ce tableau a été modifié depuis les éditions précédentes, en ce que la distinction entre les municipalités urbaines et rurales a été éliminée (voir à la page vi de l'introduction).

Les données pour les sièges sociaux, bureaux de vente, etc. et pour l'ensemble de la province figurent à la fin de chaque section provinciale du tableau.

En dernier lieu, dans chaque comté ou division de recensement, la plupart des municipalités ne figurent pas dans l'ordre alphabétique.

Tableau 7. Comtés ou divisions de recensement, par groupe d'industries et par industrie

Ce tableau est le plus complet de ceux qui figurent dans la présente publication, et il donne le détail des groupes d'industries et des industries, de même que le total agrégatif de chaque comté ou division de recensement, dans la mesure où il est publiable en vertu des dispositions de la Loi sur la statistique relatives au secret.

Tableau 8. Zones métropolitaines de recensement, par groupe d'industries et par industrie

A partir de 1966, on a classé les cités de Régina et de Saskatoon comme zones métropolitaines de recensement; elles figurent donc pour la première fois au Tableau 8.

On réunit les données sur les zones métropolitaines de recensement d'après les limites fixées en 1966, lesquelles toutefois demeurent pratiquement inchangées par rapport à 1961.

Les 18 zones métropolitaines de recensement au Canada pour lesquelles on peut publier les données sont présentées dans l'ordre alphabétique.

Tableau 9. Municipalités dont les expéditions de marchandises de propre fabrication atteignent ou dépassent dix millions de dollars, par province, par groupe d'industries et par industrie

Comme il est expliqué à la page vi de l'introduction, ce tableau comprend toutes les municipalités publiables, dans l'ordre alphabétique à l'intérieur de chaque province, dont les expéditions de marchandises de propre fabrication atteignent ou dépassent dix millions de dollars, nonobstant leur statut juridique.

Les cités comprises dans les zones métropolitaines de recensement y figurent aussi; toutefois, afin de permettre la publication du plus grand nombre de renseignements possible sur chacune des industries des zones métropolitaines de recensement, on n'a pas donné de détails sur les industries dans chacune des cités formant les zones métropolitaines de recensement. On a cependant donné des détails dans le cas des autres cités, quand cela a été possible.

Tables 10, 11 and 12. Employment and Payroll of Head
Offices, Sales Offices and Auxiliary Units

See the "Introduction" for an explanation of the statistical treatment of head offices, sales offices and auxiliary units. Employment and payroll data for these are of interest both in their own right and as components of total employment and payroll in the manufacturing industries. For example, if one is interested in obtaining data on total employment and payroll in the manufacturing industries in a given city, it is necessary to add the relevant data in Table 12 to those shown for that municipality in Tables 4, 5 or 6 which relate to establishments only. Other financial data for head offices, sales offices, etc., are shown, at the provincial level, in Table 6.

Tables 13 and 14. Selected Principal Statistics
Stratified by Total Employed per Establishment,
by Census Metropolitan Area, and Specified Mu-
nicipalities

The inclusion of these tables, together with Tables 15 and 16, marks the first time that stratified small area data have been published. Supplementing information shown in Tables 8 and 9, it is now possible not only to analyse the relative magnitude of certain industries and industry groups in Canada's larger urban centres, but also to examine the relative importance of establishments of a given size range within urban centres.

Tables 15 and 16. Selected Principal Statistics
Stratified by Value of Shipments of Goods of Own
Manufacture per Establishment, by Census Metropol-
itan Area, and Specified Municipalities

Comments given for Tables 13 and 14 are also applicable for Tables 15 and 16.

Tableaux 10, 11 et 12. Personnel et paie des sièges sociaux,
des bureaux de vente et des unités auxiliaires

Le traitement statistique des sièges sociaux, bureaux de vente et unités auxiliaires est expliqué dans l'introduction. Les données concernant l'emploi et les rémunérations en question sont intéressantes en elle-mêmes, ainsi que dans la mesure où elles constituent un composant de l'ensemble des renseignements qui concernent l'emploi et les rémunérations dans les industries manufacturières. Par exemple pour obtenir des renseignements sur le nombre total des employés et le montant global des rémunérations dans les industries manufacturières d'une cité donnée, on additionne les chiffres du Tableau 12 à ceux qui sont indiqués pour la municipalité en question aux Tableaux 4, 5 et 6 n'ayant trait qu'aux établissements mêmes. Les autres données financières concernant les sièges sociaux, les bureaux de vente, etc., au niveau provincial, figurent au Tableau 6.

Tableaux 13 et 14. Certaines statistiques principales
classées suivant le nombre total de personnes occupées
par établissement, par zone métropolitaine de recensement,
et certaines municipalités

L'inclusion de ces tableaux, de même que celle des Tableaux 15 et 16, constitue une nouveauté: c'est en effet la première fois que des données stratifiées relatives à de petites régions sont publiées. En consultant ces renseignements avec ceux qui sont donnés aux Tableaux 8 et 9, il est désormais possible non seulement de calculer la valeur relative de certaines industries et certains groupes d'industries dans de plus grands centres urbains au Canada, mais encore d'étudier l'importance relative des établissements pour un secteur donné à l'intérieur même des centres urbains.

Tableaux 15 et 16. Certaines statistiques principales
classées suivant la valeur des expéditions de marchan-
dises de propre fabrication par établissement, par zone
métropolitaine de recensement, et certaines municipalités

Les observations relatives aux Tableaux 13 et 14 restent valables pour les Tableaux 15 et 16.

SECTION DES CARTES

Index Map of Census Divisions
and Counties

The fold-out map on the facing page shows the location and identification of provinces and census divisions or counties. The provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario are subdivided into counties which are listed in alphabetical sequence at the bottom of the map. The other five provinces are subdivided into numbered census divisions.

A complete set of maps showing location of census divisions and counties, subdivisions of census divisions and counties, and constituent municipalities of Census Metropolitan Areas and Census Major Urban Areas, has been published in the report "1966 Census of Canada, Reference Maps" (Catalogue No. 92-616), available from Publications Distribution, Dominion Bureau of Statistics, for \$1.00.

Map of Distribution of Manufacturing
Activity by County or Census
Division, Canada, 1966

The map shows the value added by manufacturing activity in Canada for 1966, distributed by county or census division. Those counties or census divisions not containing a colored circle have a value added of less than \$5,000,000 while the area of the circle shown in the others is proportional to the value added.

The location of the Census Metropolitan Areas is shown by shaded areas, but colored circles centered on these relate to the value added of counties or census divisions and not of the Census Metropolitan Areas.

Map of Change in Manufacturing Activity
by County or Census Division,
Canada, 1961-1966

This map shows the percentage change for the 1961-1966 period of value added by manufacturing activity, by county or census division.

In general, the darker the shading of a county, or census division, the higher the percentage increase, while the lightest of the seven gradations in shading indicates a decrease in value added by manufacturing activity for the 1961-1966 period.

Carte-index des divisions de recensement et
comtés

Le dépliant ci-contre indique l'emplacement et le nom des provinces et des divisions de recensement ou des comtés dans chaque province. L'Île-du-Prince-Édouard, la Nouvelle-Écosse, le Nouveau-Brunswick, le Québec et l'Ontario sont subdivisés en comtés, dont la liste alphabétique figure au bas de la carte. Les cinq autres provinces sont subdivisées en divisions de recensement numérotées.

On a publié un ensemble complet de cartes délimitant les divisions de recensement et les comtés, et les subdivisions des divisions de recensement et des comtés, de même que les municipalités comprises dans chacune des zones métropolitaines de recensement et des grandes agglomérations urbaines de recensement. Il a pour titre "Recensement du Canada 1966, Cartes de référence" (numéro de catalogue 92-616) et on peut se le procurer à la Distribution des publications, Bureau fédéral de la statistique, au prix de \$1.00.

Carte sur la répartition de l'activité
manufacturière, par comté ou division
de recensement, Canada 1966

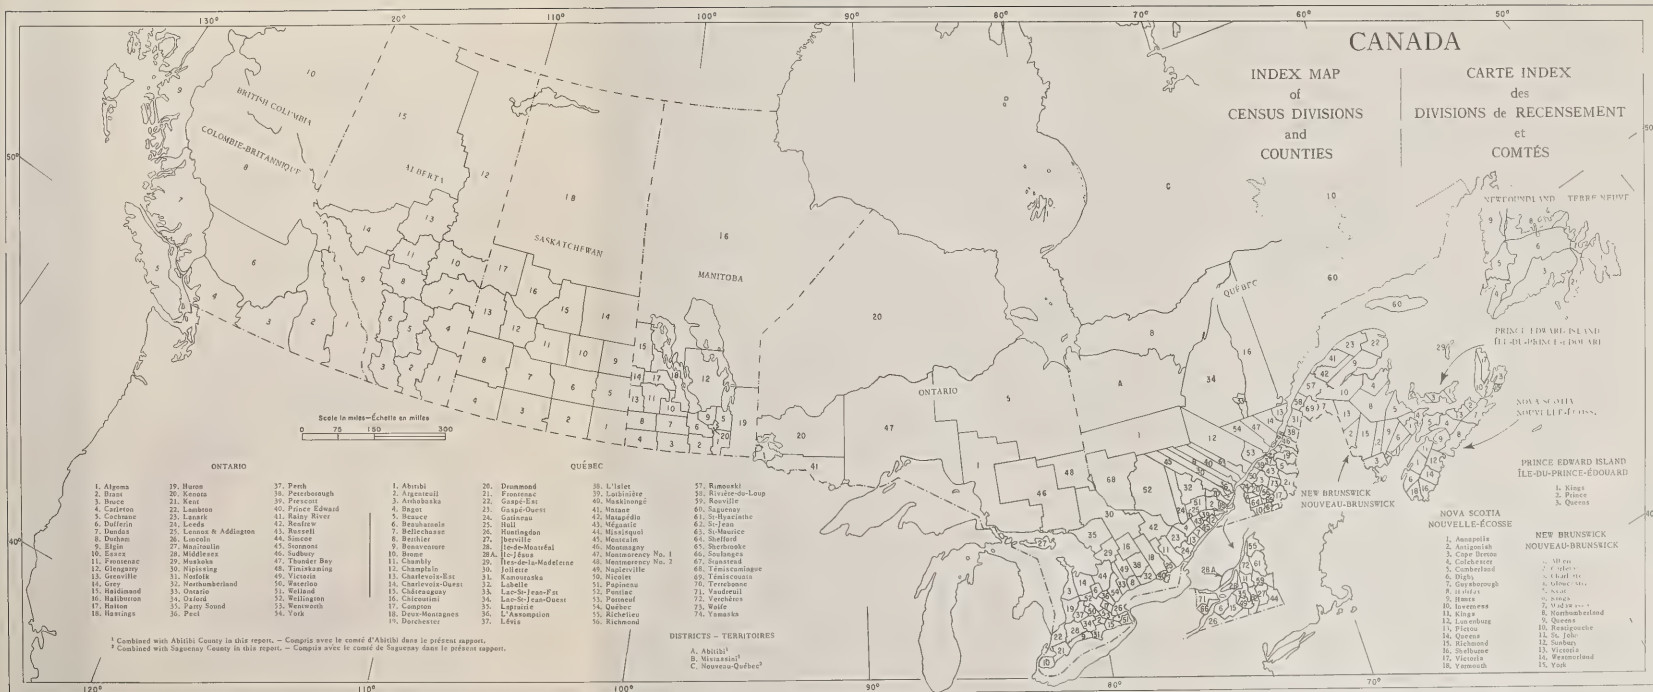

Cette carte indique la valeur ajoutée par l'activité manufacturière au Canada en 1966, distribuée par comté ou division de recensement. Les comtés ou divisions de recensement qui ne renferment pas de cercle de couleur ont une valeur ajoutée de moins de \$5,000,000; la surface du cercle dans les autres cas est proportionnelle à la valeur ajoutée.

Les aires ombrées représentent les zones métropolitaines de recensement, mais les cercles de couleur centrés dans ces aires représentent la valeur ajoutée des divisions de recensement ou des comtés, et non des zones métropolitaines de recensement.

Carte sur la variation de l'activité manufac-
turière, par comté ou division de
recensement, Canada, 1961-1966

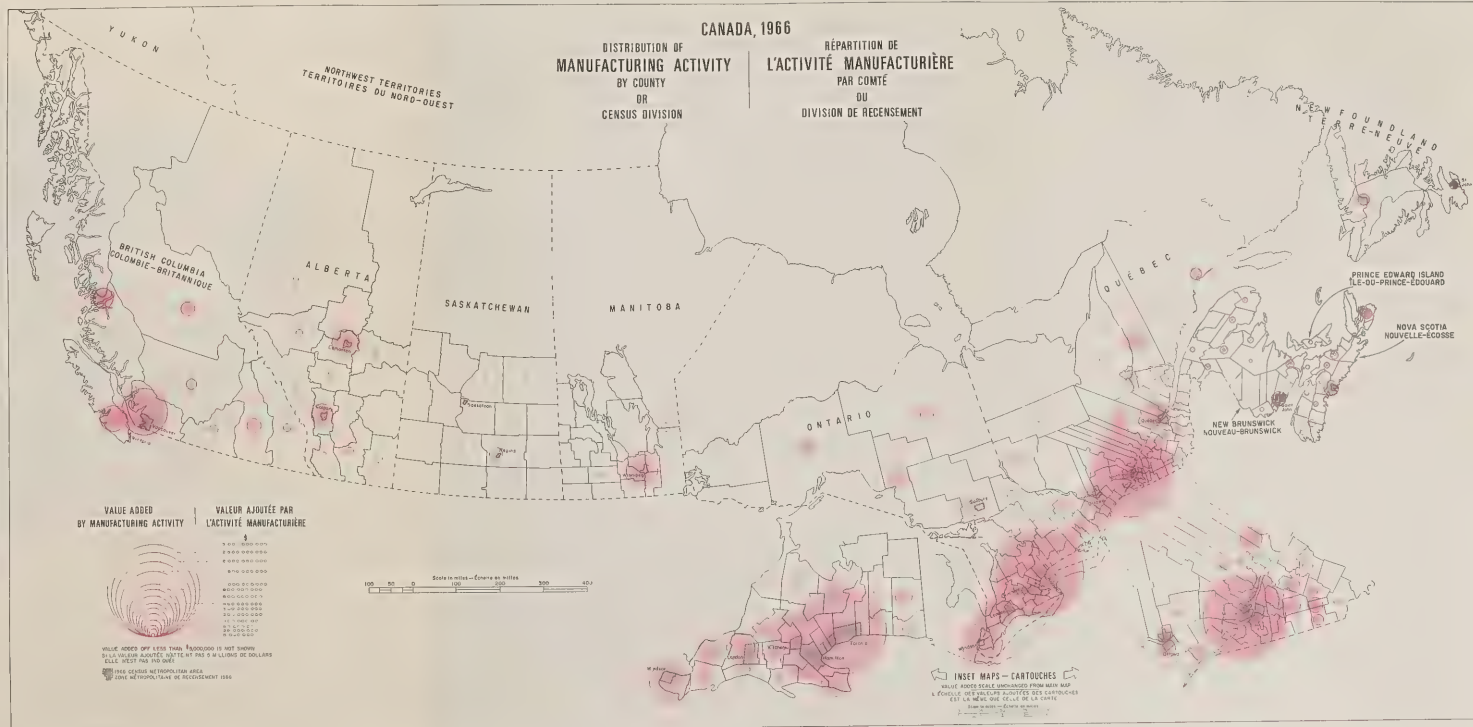

Cette carte indique la variation en pourcentage de la valeur ajoutée par l'activité manufacturière au cours de la période 1961-1966, par comté ou division de recensement.

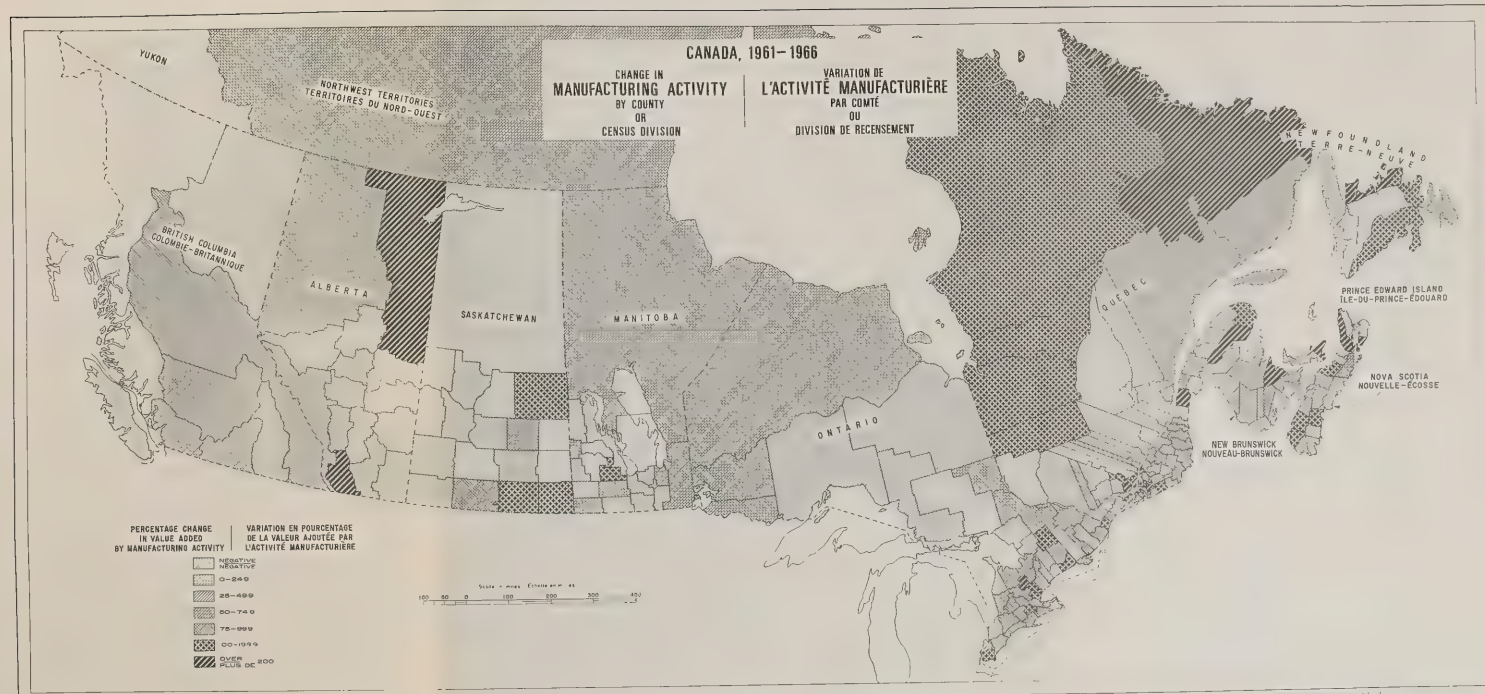

D'une manière générale, plus le grisé est foncé, plus le taux d'accroissement est élevé, alors que la plus claire des sept teintes indique que la valeur ajoutée par l'activité manufacturière a diminué au cours de la période 1961-1966.

- (1) For principal changes in classification, concept and coverage during the 1917-1961 period, see footnotes to Tables 1 and 20 in the 1961 issue of Catalogue No. 31-203, "Manufacturing Industries of Canada: Section A, Summary for Canada". -- Voir aux renvois des tableaux 1 et 20 de l'édition de 1961 de la publication No. 31-203, intitulée "Industries manufacturières du Canada: Section A, Sommaire", les principales modifications apportées à la classification, au concept et à la couverture entre 1917 et 1961.
- (2) Prior to 1952, the basis of collection was gross value of products. -- Avant 1952, la collecte était fondée sur la valeur brute des produits.
- (3) Beginning with the second set of 1961 data shown, some statistics are compiled for "Manufacturing activity" and others for "Total activity". "Total activity" includes non-manufacturing activities of manufacturing establishments and activities of separate head offices, sales offices and auxiliary units. "Total employees" and "Salaries and wages" in the revised 1961 and subsequent data are thus not comparable with earlier statistics under the same headings. -- A compter de la deuxième série de données pour 1961, certaines données statistiques sont calculées pour l'activité manufacturière et d'autres pour l'activité totale. L'activité totale comprend les activités des établissements manufacturiers et celles des sièges sociaux, des bureaux de vente et des unités auxiliaires séparées. Les données rectifiées de 1961 et celles des années subséquentes sous les entêtes "Total, employés" et "Traitements et salaires" ne sont donc pas comparables à celles qui figuraient précédemment sous les mêmes entêtes.
- (4) These 1961 data embody revisions or classification changes introduced since issuance of the 1961 data shown first above. For descriptions of these changes, see the 1962 and 1964 issues of Catalogue No. 31-203, "Manufacturing Industries of Canada: Section A, Summary for Canada". -- Ces données pour 1961 résultent des rectifications et des changements de classification apportés depuis la parution des données de 1961 qui figurent les premières. Voir aux éditions de 1962 et 1964 de la publication No. 31-203, intitulée "Industrie manufacturières du Canada: Section A, Sommaire", la description de ces modifications.

(1) For principal changes in classification, concept and coverage during the 1917-1961 period, see footnotes to Tables 1 and 20 in the 1961 issue of Catalogue No. 31-203, "Manufacturing Industries of Canada: Section A, Summary for Canada". -- Voir aux renvois des tableaux 1 et 20 de l'édition de 1961 de la publication n° 31-203, intitulée "Industries manufacturières du Canada: Section A, Sommaire", les principales modifications apportées à la classification, au concept et à la couverture entre 1917 et 1961. (2) Prior to 1952, the basis of collection was gross value of products. -- Avant 1952, la collecte était fondée sur la valeur brute des produits. (3) Beginning with the second set of 1961 data shown, some statistics are compiled for "Manufacturing activity" and others for "Total activity". "Total activity" includes non-manufacturing activities of manufacturing establishments and activities of separate head offices, sales offices and auxiliary units. "Total employees" and "Salaries and wages" in the revised 1961 and subsequent data are thus not comparable with earlier statistics under the same headings. -- À compter de 1961, certaines données statistiques sont calculées pour l'activité manufacturière et d'autres pour l'activité totale. "Total activity" comprend les activités non manufacturières des établissements manufacturiers et celles des sièges sociaux, des bureaux de vente et des unités auxiliaires séparés. Les données rectifiées de 1961 et celles des années subséquentes sous les en-têtes "Total, employés" et "Traitements et salaires" ne sont donc pas comparables à celles qui figuraient précédemment sous les mêmes en-têtes. (4) These 1961 data embody revisions or classification changes introduced since issuance of the 1961 data shown first above. For descriptions of these changes, see the 1962 and 1964 issues of Catalogue No. 31-203, "Manufacturing Industries of Canada: Section A, Summary for Canada". -- Ces données pour 1961 résultent des rectifications et des changements de classification apportés depuis la parution des données de 1961 qui figurent les premières. Voir aux éditions de 1962 et 1964 de la publication n° 31-203, intitulée "Industries manufacturières du Canada: Section A, Sommaire", la description de ces modifications.

Title

31-201 General Review of the Manufacturing Industries of Canada

Manufacturing Industries of Canada:

- 31-203 Section A - Summary for Canada
- 31-204 B - Atlantic Provinces
- 31-205 C - Quebec
- 31-206 D - Ontario
- 31-207 E - Prairie Provinces
- 31-208 F - British Columbia, Yukon and Northwest Territories
- 31-209 G - Geographical Distribution(1)
- 31-210 H - Type of Organization and Size of Establishments

31-211 Products Shipped by Canadian Manufacturers

(1) Principal statistics of industries for census divisions or counties and municipalities.

With the exception of "Products Shipped by Canadian Manufacturers", Catalogue No. 31-211, all of the general reports are published in English and French.

In addition to these general reports, there are some 135 annual reports on individual industries based on the Census of Manufactures. These reports contain quantities and values of products shipped by the individual industry (published earlier than in the comprehensive report, "Products Shipped by Canadian Manufacturers", listed above), materials used, breakdowns by size of establishment, lists (for most industries) of establishments and other detail not given elsewhere.

A list of all the reports on the Census of Manufactures is included in the Bureau's Subscription Order Form, obtainable on request from the Publications Distribution Unit, Dominion Bureau of Statistics, Ottawa.

RAPPORTS CONCERNANT LE RECENSEMENT ANNUEL DES MANUFACTURES

Le présent rapport fait partie de la série générale qui s'applique à toutes les industries et qui donne les résultats du Recensement annuel des manufactures. Voici la série générale complète contenant les principales statistiques sur chaque industrie en particulier et sur les groupes d'industries au Canada entier ou dans ses différentes subdivisions géographiques:

Revue générale des industries manufacturières du Canada

Industries manufacturières du Canada:

- Section A - Sommaire
- B - Provinces de l'Atlantique
- C - Québec
- D - Ontario
- E - Provinces des Prairies
- F - Colombie-Britannique, Yukon et Territoires du Nord-Ouest
- G - Répartition géographique(1)
- H - Forme d'organisation et taille des établissements

...

(1) Principales statistiques sur les industries par division de recensement ou par comté et municipalité.

À l'exception de Products Shipped by Canadian Manufacturers (numéro de catalogue 31-211), tous les rapports de la série générale paraissent en anglais et en français.

En plus des rapports généraux, il y a quelques 135 rapports sur des industries particulières tirés du Recensement annuel des manufactures. Ils contiennent les données suivantes: quantité et valeur des produits expédiés par une industrie particulière (ainsi, ces renseignements paraissent plus tôt que le rapport plus détaillé intitulé Products Shipped by Canadian Manufacturers et indiqué ci-dessus) matières utilisées, répartitions suivant l'importance de l'établissement, listes des établissements (ceci s'applique à la plupart des industries) et autres détails qui ne paraissent nulle part ailleurs.

Les publications sur le recensement des manufactures sont énumérées dans le Bulletin d'abonnement aux publications du B.F.S., qu'on peut se procurer sur demande à la Distribution des publications, Bureau fédéral de la statistique, Ottawa.

1968 SUB-PROVINCIAL DATA

Delays in implementing more sophisticated programs to take advantage of the Bureau's larger computer facilities have, unfortunately, made it necessary to cancel the 1968 issue of this publication.

Less detailed hand-manuscripted data, however, are or will be available in the form of three Preliminary Bulletins:

"Manufacturing Industries - Geographical Distribution, Counties or Census Divisions" (Catalogue No. 31-209-P-1) which contains total, all-industry data for counties or census divisions; published in June 1971.

"Manufacturing Industries - Geographical Distribution, Selected Municipalities and Census Metropolitan Areas" (Catalogue No. 31-209-P-2) which shows total, all-industry data for municipalities and Census Metropolitan Areas; published in August 1971.

"Manufacturing Industries - Geographical Distribution, Industry Group data for Selected Municipalities and Census Metropolitan Areas" (Catalogue No. 31-209-P-3), which will be published at a later date. In addition, certain unpublished data for 1968 will be available on the same conditions as for 1967; please see page vi of the introduction.

DONNÉES INFRAPROVINCIALES POUR 1968

Des retards dans la préparation de programmes plus complexes visant à tirer profit des ordinateurs plus puissants ont malheureusement entraîné l'annulation de l'édition 1968 de la présente publication.

Cependant, les données manuscrites moins détaillées sont (ou seront) disponibles sous la forme de trois bulletins provisoires:

"Industries manufacturières - répartition géographique, comtés ou divisions de recensement" (numéro 31-209-P-1 au catalogue), où figurent les données totales pour toutes les industries par comté et par division de recensement; il a paru en juin 1971.

"Industries manufacturières - répartition géographique, quelques municipalités et zones métropolitaines de recensement" (numéro 31-209-P-2 au catalogue), où figurent les données totales pour toutes les industries par municipalité et par zone métropolitaine de recensement; il a paru en août 1971.

"Industries manufacturières - répartition géographique, données sur les groupes d'industries, quelques municipalités et zones métropolitaines de recensement" (numéro 31-209-P-3) au catalogue, qui sera publié ultérieurement. De plus, certaines données non publiées pour 1968 seront disponibles aux mêmes conditions que celles pour 1967. Veuillez vous reporter à la page vi de l'introduction.

INTRODUCTION

Unpublished Small Area Statistics

In addition to data published in this report, it might be possible to accommodate special requests for sub-provincial manufacturing data.

Depending on the nature and extent of the request it may be necessary to levy a charge. To determine the feasibility of meeting specific requests and whether charges would be involved, please direct inquiries to the Regional Statistics Unit, Analysis and Development Section, Manufacturing and Primary Industries Division, Dominion Bureau of Statistics, Tunney's Pasture, Ottawa; telephone (613) 996-4439.

Changes From Previous Issues

Beginning with this issue, statistics for the forty leading industries by province have been omitted. Similar data are now published in the 1967 and subsequent issues of "Manufacturing industries of Canada, Summary A" (Catalogue No. 31-203). Further changes from the 1966 issue consist of the inclusion of a table showing changes in the magnitude of manufacturing activity for the 1962-1967 period for counties or census divisions.

While changes between the 1966 and 1967 issues are relatively minor, other post-1961 changes were more significant. For a summary of the features of these changes, in particular those relating to "Total activity statistics", "Manufacturing activity statistics", "Employment concept", and "Revisions to 1961 data", please see the introduction to the 1964 issue.

Notes on "Concepts and Definitions", omitted from this report for reasons of economy, may be obtained from the Manufacturing and Primary Industries Division of the Bureau upon request. These are essentially the same as those published in 1965 reports of this series, but do record the introduction, beginning with the 1966 Census, of use of the same reporting year for all employee data as for other data. Previously, respondents basing their returns on a financial year differing from the calendar year were requested to report employee data for the calendar year (the preferred period for all data under both sets of reporting instructions).

Use of Computer Print-out

The introduction of computer processing, beginning with the 1961 Census of Manufactures, has made more readily available a greatly extended range of detailed statistics and has made possible the direct photographic reproduction of many of the tables in this report from computer print-out. The preparation of tables by computer, however, has involved certain changes in the sequence and identifying detail of industry groups and individual industries:

(a) In tables which provide data by industry group, groups classified as producing durable goods are listed first, followed by those classified as producing non-durable goods. However, within these two categories, the groups are still listed in the order in which they occur in the Standard Industrial Classification:

Statistiques non publiées sur les petites régions

En plus des renseignements publiés dans le présent rapport, il serait possible de donner suite à des demandes spéciales pour des données infraprovinciales sur les industries manufacturières.

Selon la nature et l'importance de la demande, l'utilisateur aura éventuellement à assumer des frais. Afin de déterminer la possibilité de répondre aux demandes spécifiques des utilisateurs et de savoir s'il y aura des frais à assumer, veuillez envoyer vos demandes de renseignements directement à la Sous-section des statistiques régionales, Section de l'analyse et des développements, Division des industries manufacturières et primaires, Bureau fédérale de la statistique, Parc Tunney, Ottawa. Téléphone: (613) 996-4439.

Modifications depuis les éditions précédentes

À compter de la présente édition, on ne trouvera plus les statistiques par province des quarante principales industries. Des données semblables sont maintenant publiées dans les éditions de 1967 et suivantes de la publication "Industries manufacturières du Canada, section A, sommaire" (numéro 31-203 au catalogue). Un autre changement par rapport à l'édition de 1966 consiste en l'insertion d'un tableau indiquant les variations en importance de l'activité manufacturière au cours de la période 1962-1967 pour les comtés ou les divisions de recensement.

Si les modifications apportées pour 1967 par rapport à 1966 sont relativement minimes, celles qui portent sur les années 1961 et suivantes sont plus appréciables. Les caractéristiques de ces modifications, en particulier en ce qui concerne la "Statistique de l'activité totale", la "Statistique de l'activité manufacturière", le "Concept de l'emploi", et les "Rectifications des données de 1961", sont résumées dans l'introduction à l'édition de 1964, à laquelle on est prié de se reporter.

Les notes concernant les "Concepts et définitions", qui n'ont pas été reproduites ici pour des raisons d'économie, peuvent être obtenues de la Division des industries manufacturières et primaires du Bureau sur simple demande. Ces notes sont sensiblement identiques à celles que contenait la série correspondante de publications pour 1965, sauf qu'à partir du recensement des manufactures de 1966, tous les renseignements concernant le personnel sont déclarés pour la même période que les autres données. Auparavant, les sociétés dont les déclarations se rapportaient à une année financière différente de l'année civile devaient déclarer les renseignements concernant leur personnel sur la base de l'année civile. (Il reste toujours préférable que les déclarations soient faites sur la base de l'année civile).

Utilisation d'états mécanographiques

À compter du recensement des manufactures de 1961, l'utilisation du traitement électronique des données a permis de présenter une gamme beaucoup plus vaste de statistiques détaillées et a rendu possible la reproduction photographique directe d'un bon nombre des tableaux du présent rapport à partir d'états mécanographiques. La préparation électronique des tableaux a néanmoins nécessité certains changements dans la disposition et la désignation des groupes d'industries et des industries individuelles:

(a) Dans les tableaux où figurent des données réparties par groupe d'industries, les groupes classés comme producteurs de biens durables précèdent ceux des producteurs de biens non-durables. Dans ces catégories, toutefois, les groupes sont toujours disposés suivant le même ordre que dans la Classification type des industries:

Durable goods-producing industry groups

Wood industries
Furniture and fixture industries
Primary metal industries
Metal fabricating industries
Machinery industries
Transportation equipment industries
Electrical products industries
Non-metallic mineral products industries

Non-durable goods-producing industry groups

Food and beverage industries
Tobacco products industries
Rubber industries
Leather industries
Textile industries
Knitting mills
Clothing industries
Paper and allied industries
Printing, publishing and allied industries
Petroleum and coal products industries
Chemical and chemical products industries
Miscellaneous manufacturing industries

(b) An identifying Standard Industrial Classification code precedes the industry name in all tables showing individual industry data, and an identifying major group code precedes the industry group name in all tables showing major industry group data. Please see Appendix II for a complete list of these codes. Because of space limitation caused by longer French names, these identifying code numbers appear only with English industry name.

(c) Industry names have been confined to one line, necessitating abbreviations in some cases.

(d) It has been necessary to omit accents from French words.

Municipality

The term "municipality", as used in this report, includes incorporated cities, towns and villages, as well as other organized areas such as townships, parishes or district municipalities.

The differentiation between urban and rural municipalities was discontinued in the 1965 issue, since it had become a somewhat misleading designation as an indicator of the degree of industrialization. For example, highly industrialized municipalities, such as Etobicoke Township, Ontario, and the District Municipality of Burnaby, B.C. are, for some purposes, designated "rural" municipalities.

"Other Industries" and "Other Major Groups" Categories

These categories are not part of the Standard Industrial Classification. Rather, they contain the residual of industries or industry groups, as the case may be, which cannot be published because of the secrecy provisions of the Statistics Act. It is important to realize that the content of these categories is not constant. To illustrate, in a given municipality the "Other industries" for major group 9 "Furniture and fixture industries" might consist of S.I.C. 264 "Office furniture industry" and of S.I.C. 266 "Other furniture industries", while in another municipality the residual might consist of S.I.C. 261 "Household furniture industry" and S.I.C. 268 "Electric lamp and shade industry". Furthermore, the content of the "residual" might not only vary between municipalities, but also for the same municipality for different years.

Groupes d'industries, producteurs de biens durables

Industrie du bois
Industrie du meuble et des articles d'ameublement
Industrie métallique primaire
Industrie des produits métalliques
Industrie de la machinerie
Industrie du matériel de transport
Industrie des appareils et du matériel électriques
Industrie des produits minéraux non métalliques

Groupes d'industries, producteurs de biens non durables

Industrie des aliments et boissons
Industrie du tabac
Industrie du caoutchouc
Industrie du cuir
Industrie textile
Bonneterie
Industrie du vêtement
Industrie du papier et produits connexes
Imprimerie, édition et industries connexes
Industrie des dérivés du pétrole et du charbon
Industrie chimique et des produits connexes
Industries manufacturières diverses

(b) Dans tous les tableaux qui donnent les résultats d'industries individuelles, un code d'identification tiré de la Classification type des industries figure devant la désignation de l'industrie, et dans tous les tableaux qui donnent les résultats par groupe d'industries un numéro de groupe d'industries figure devant la désignation de chaque groupe. Veuillez vous reporter à l'annexe II, où figure une liste complète de ces codes. En raison du manque de place imposé par l'utilisation de désignations en français, ces numéros de code ne figurent qu'en face des désignations anglaises.

(c) On n'a pu consacrer qu'une seule ligne à la désignation des industries, qui a dû être abrégée dans certains cas.

(d) Il a fallu omettre les accents en français.

Municipalité

Le terme "municipalité" dans le présent rapport s'applique aux cités, villes et villages constitués, ainsi qu'à d'autres régions organisées, tels que cantons, paroisses ou municipalités de district.

La distinction entre municipalités urbaines et rurales a été abandonnée dans l'édition de 1965, car en tant qu'indicateur du degré d'industrialisation, elle prêtait à confusion. Par exemple, des municipalités fortement industrialisées, telles que le canton d'Etobicoke, en Ontario, et la municipalité de district de Burnaby, en Colombie-Britannique, sont, pour certains besoins, toutes deux désignées comme municipalités "rurales".

Catégories des "Autres industries" et "Autres groupes principaux"

Ces catégories ne figurent pas dans la Classification type des industries. De fait, on y a inclus le reliquat d'industries ou de groupes d'industries selon le cas, qui ne pouvaient être publiés en vertu des dispositions de la Loi sur la statistique relatives au secret. Il faut bien noter que le contenu de ces catégories n'est pas constant. Ainsi, dans une municipalité donnée, les "Autres industries" du groupe principal n° 9 "Industrie du meuble et des articles d'ameublement" pourraient comprendre les rubriques de la C.T.I. n° 264 "Industrie des meubles de bureau" et 266 "Autres industries du meuble", alors que dans une autre municipalité, le reliquat pourrait être composé des rubriques de la C.T.I. n° 261 "Industrie des meubles de maison" et 268 "Industrie des lampes électriques et des abat-jour". D'autre part, non seulement le "reliquat" peut varier d'une municipalité à l'autre, mais encore à l'intérieur d'une même municipalité d'une année à l'autre.

Confidentiality of Data

The Dominion Bureau of Statistics is prohibited by law from publishing any statistics which would divulge information relating to an individual company without the previous consent in writing of that company. In practice, this means that no data except for number, type and location of establishments are shown for industrial or geographic aggregations composed of fewer than three establishments, or of three or more if these are dominated by one or two establishments or companies.

In order to provide a systematic publication pattern which will prevent indirect (or residual) disclosure, choices must often be made between the publication or suppression of different levels of industrial or geographic data. Such decisions are made in accordance with an order of precedence designed to provide as detailed data as possible consistent with provisions of the Statistics Act and requirements for industrial and regional analysis.

For individual industries, industry groups, and all-industry totals, Canada is given preference over provinces, provinces over counties or census division and counties or census divisions over municipalities. Similarly, in tables showing industry detail, all-industry totals take precedence over two-digit industry groups, and industry groups over their component three and four-digit industries. The major exception to the practice of giving preference to higher levels of geographic aggregation is Census Metropolitan Areas, where individual industries and industry groups have been given preference over those in the counties or census divisions in which they are located, as well as over those of their component municipalities.

Head Offices, Sales Offices and Auxiliary Units

The statistical treatment of head offices, sales offices and auxiliary units, is concerned primarily with individual industries and industry groups at the provincial and national levels. Additional factors must be considered when data for such reporting units are compiled at the sub-provincial level.

At the provincial level, statistics of the manufacturing industries are considered to be consistent for practical purposes despite occasional minor distortions introduced by the inclusion of separate head and auxiliary offices in the totals. At the county and municipal level, however, the effects of such inclusions are considered serious enough to warrant special treatment. For example, since head offices of large multi-unit firms with Canada-wide operations tend to be located in the large metropolitan areas such as Toronto and Montreal, industry statistics for these centres would be overloaded with expenses relative to revenue and thus would distort inter-city or inter-area comparisons of manufacturing activity.

In order to avoid such distortions, the basic tables on geographic or location statistics (counties, Census Metropolitan Areas and municipalities) are confined to the principal statistics of establishments which exclude separately located head and auxiliary offices. Head offices of single-establishment firms that are located elsewhere than in the same municipality as the manufacturing establishment, and most head offices of multi-establishment firms, are asked to submit separate "head office" reports. These head offices, as well as establishments showing, on their reports, employment at other locations, are asked to report employment and payrolls, by location, of any auxiliary employing 15 or more persons. These data are then given appropriate geographic codes and tabulated separately along with the main head office and other auxiliary units that have submitted separate "head office" reports. Those auxiliary offices that

Secret statistique

Aux termes de la Loi, le Bureau fédéral de la statistique ne peut publier aucune statistique entraînant la divulgation de renseignements sur une société individuelle sans l'autorisation écrite préalable de celle-ci. En pratique, cela signifie qu'aucune donnée, à l'exception du nombre, du type et de l'adresse des établissements n'est publiée pour des agrégats industriels ou géographiques comportant moins de trois établissements, ou trois établissements et plus lorsqu'il existe une prédominance d'un ou de deux établissements ou sociétés.

Dans le but d'établir un schéma systématique de publication empêchant la divulgation indirecte par recoupement, il faut souvent choisir entre la publication ou la suppression des données à certains niveaux de la répartition industrielle ou géographique. La décision de ce choix tient compte d'un ordre de priorité conçu pour permettre de fournir des statistiques aussi détaillées que possible dans le cadre des dispositions de la Loi sur la statistique, tout en répondant aux exigences de l'analyse par industrie et par région.

En ce qui concerne les industries, les groupes d'industries et l'ensemble des industries, le Canada a la priorité sur les provinces, les provinces sur les comtés ou divisions de recensement, et les comtés ou divisions de recensement sur les municipalités. De même, dans les tableaux détaillés par industrie, le total de l'ensemble des industries a la priorité sur celui du groupe d'industries à deux chiffres et le total du groupe d'industries a priorité sur les totaux des industries à trois ou à quatre chiffres qui les composent. On déroge surtout à la règle qui consiste à accorder la priorité à l'ensemble géographique plus étendu dans le cas des zones métropolitaines de recensement qui prennent le pas sur le comté ou la division de recensement où se trouve l'industrie considérée, ainsi que sur les municipalités qui font partie de cette zone.

Sièges sociaux, bureaux de vente et unités auxiliaires

Le traitement statistique des sièges sociaux, des bureaux de vente et des unités auxiliaires vise avant tout les industries particulières et les groupes d'industries aux niveaux provincial et national. Il faut tenir compte d'autres facteurs quand on réunit au niveau infraprovincial les données de ces unités déclarantes.

Au niveau provincial, on estime que la statistique des industries manufacturières est, en pratique, cohérente, malgré de légères déformations occasionnelles due à l'inclusion dans le total des chiffres relatifs aux sièges sociaux et aux bureaux auxiliaires distincts. Au niveau des comtés et des municipalités, toutefois, les incidences de ces inclusions sont jugées assez importantes pour motiver un traitement particulier. Par exemple, comme le siège des grandes entreprises à établissements multiples dont les activités s'étendent au Canada tout entier est d'ordinaire situé dans les grandes zones métropolitaines, comme Montréal et Toronto, la statistique industrielle de ces centres révélerait beaucoup plus de dépenses que de recettes, ce qui fausserait les comparaisons de l'activité manufacturière entre les cités ou entre les régions.

Pour éviter cette distorsion, les tableaux fondamentaux de statistiques géographiques (comtés, zones métropolitaines de recensement et municipalités) s'en tiennent aux statistiques principales des établissements et ne comprennent pas les statistiques des sièges sociaux et des bureaux auxiliaires situés dans des municipalités différentes. Les sièges sociaux d'entreprises à établissement unique qui ne sont pas situés dans la même municipalité que l'établissement manufacturier et la plupart des sièges sociaux des entreprises à établissements multiples doivent remplir des déclarations distinctes de "siège social". Ces sièges sociaux, de même que les établissements qui déclarent avoir des employés ailleurs, doivent déclarer le nombre d'employés et la rémunération, par endroit, de toute unité auxiliaire employant 15 personnes ou plus. Les déclarations de ces unités sont marquées du numéro de code géographique approprié et dépouillées séparément en même temps que celles des sièges sociaux et des autres unités auxiliaires qui ont présenté des déclarations distinctes de "siège social".

employ fewer than 15 persons are left in the establishment or head office returns on which they were reported as it would not be practicable to ask for separate location listings of all auxiliary units that employ small numbers of workers.

Publishable data on employment and payroll of head offices, sales offices and auxiliary units are shown for counties or census divisions, Census Metropolitan Areas and cities in Tables 10, 11 and 12, respectively.

EXPLANATORY NOTES ON INDIVIDUAL TABLES

To facilitate the use of the data shown in this publication, the following explanations relating to specified individual tables are provided.

Table 3. Changes in Value added by Manufacturing Activity by Province and County or Census Division 1962-1967

Showing 1962 and 1967 value added data, as well as percentage change for this five-year period, the table gives a general picture of relative performance of manufacturing activity in each county or census division. When interpreting the data, however, it is important to keep in mind that distortions are caused by the selection of the two reference years, as well as of the criteria of value added instead of some other economic indicator, such as number of employees.

Table 4. Municipalities by Province

This table is probably the most convenient one to use in order to obtain "all-industry" manufacturing totals for a particular municipality and for only one year, 1967. The arrangement, by provinces ranged from east to west, and by municipalities alphabetically arranged within each province, is the same as in previous issues of this report.

There are, of course, many municipalities for which data cannot be published without substantially revealing the operations of one or two establishments; such municipalities having three or more establishments are listed in Appendix I.

The municipalities included in Table 4 are identical with those shown in Tables 5 and 6.

Table 5. Municipalities Ranked by Shipments

There are two very important qualifications which should be kept in mind when using this table:

1. It includes only those municipalities for which data can be published;
2. It ranks the municipalities by only one criterion-value of shipments of goods of own manufacture.

Because of the obvious limitations which these two qualifications impose, it is necessary to use a certain amount of caution in drawing conclusions about the importance of a given municipality as a manufacturing centre. It cannot be determined with any degree of assurance that a municipality ranks 10th, 20th, or any other place, as one or more unpublished municipalities may, in fact, have larger shipments than the one under consideration. For this reason, numerical rankings have been intentionally omitted from the table.

Les données concernant les bureaux auxiliaires employant moins de 15 personnes continuent d'être comprises dans les déclarations des établissements ou des sièges sociaux dont ils relèvent, étant donné qu'il serait peu pratique d'exiger des déclarations distinctes pour chaque unité auxiliaire qui n'emploie qu'un petit nombre de travailleurs.

Les données publiables sur l'emploi et les rémunérations dans les sièges sociaux, les bureaux de vente et les unités auxiliaires, classées par comté ou division de recensement, zone métropolitaine de recensement et cité, paraissent aux Tableaux 10, 11 et 12 respectivement.

NOTES EXPLICATIVES SUR CERTAINS TABLEAUX

Les explications ci-dessous se rapportant aux tableaux spécifiques sont destinées à faciliter l'utilisation des données que contient la présente publication.

Tableau 3. Variations de la valeur ajoutée par l'activité manufacturière, par province et comté ou division de recensement, 1962 et 1967

Ce tableau, qui indique les chiffres de la valeur ajoutée pour 1962 et 1967, ainsi que les variations en pourcentage pour cette même période, donne une idée générale des résultats relatifs de l'activité manufacturière dans chaque comté ou chaque division de recensement. Cependant, lors de l'interprétation des données, il est important de se rappeler que le choix des deux années de base ainsi que des critères de la valeur ajoutée de préférence à un autre indicateur économique, comme le nombre d'employés, peut causer certaines distortions.

Tableau 4. Municipalités par province

Ce tableau est probablement celui qui se prête le plus commodément à l'obtention de l'activité manufacturière totale "toutes industries" pour une municipalité donnée et pour la seule année 1967. La présentation par provinces classées de l'est à l'ouest, et par municipalités dans l'ordre alphabétique à l'intérieur de chaque province, est identique à celle qui avait été adoptée dans les éditions précédentes de ce rapport.

Il existe, bien entendu, un grand nombre de municipalités pour lesquelles les données ne peuvent être publiées sans révéler une bonne partie des activités d'un ou de deux établissements; la liste de telles municipalités qui comprennent trois établissements ou plus figure à l'Annexe I.

Les municipalités qui figurent au Tableau 4 sont les mêmes que celles des Tableaux 5 et 6.

Tableau 5. Municipalités classées selon les expéditions

Il y a deux points importants à signaler au sujet de ce tableau:

1. Il ne comprend que les municipalités sur lesquelles on peut publier des données;
2. Les municipalités n'y sont classées que selon un seul critère: la valeur des expéditions de marchandises de propre fabrication.

En raison des limitations évidentes qu'imposent ces deux critères, les conclusions tirées quant à l'importance d'une municipalité comme centre manufacturier sont sujettes à caution. Il est impossible, à partir de ce tableau, de savoir si une municipalité se classe au 10^e, au 20^e ou à un autre rang, puisqu'il peut se trouver d'autres municipalités non inscrites dont les expéditions soient plus importantes. C'est pour cette raison qu'on a délibérément omis le classement numérique par taille dans ce tableau.

Equally important, a municipality which has a certain rank on the basis of value of shipments may rank higher or lower on the basis of other criteria such as value added, employment, or salaries and wages paid.

Despite these limitations, the table can serve as a general guide to the relative importance of various municipalities and provides, in expanded coverage, data comparable to those in previous reports.

Table 6. Counties or Census Divisions, by Municipality

Beginning with the 1965 issue, this table has changed from previous reports in that the urban-rural separation has been eliminated (see page vii of the "Introduction").

Data for head offices, sales offices, etc. and for the province as a whole are published at the end of each provincial section of the table.

Finally, municipalities for each county or census division are, in most cases, not listed in alphabetical sequence.

Table 7. Counties or Census Divisions, by Industry Group and Industry

This is the most comprehensive table in this report, showing industry group and industry detail, as well as the aggregate total for each county or census division, if publishable under the secrecy provisions of the Statistics Act.

Tableau 8. Census Metropolitan Areas, by Industry Group and Industry

Beginning with 1966, the cities of Regina and Saskatoon were classified as Census Metropolitan Areas and are, therefore, included in Table 8.

The Census Metropolitan Area data are compiled on the basis of the respective 1966 boundary definition which, however, remained relatively unchanged from the 1961 delineation.

The 18 Census Metropolitan Areas, for which data can be published, are arranged in alphabetical order within Canada.

Table 9. Municipalities with Shipments of Goods of Own Manufacture of \$10,000,000 or More, by Province, Industry Group and Industry

As already explained on page vii of the "Introduction", this table includes all publishable municipalities, alphabetically arranged within province, with shipments of goods of own manufacture of \$10,000,000 or more, regardless of the legal status of incorporation.

Component cities of Census Metropolitan Areas are included in the table, but in order to ensure maximum publishability of individual industries for the Census Metropolitan Areas, no industry group detail has been shown for component cities. However, industry group as well as industry detail has been published for other cities wherever possible.

Il est également important de se rappeler qu'une municipalité qui occupe un certain rang fondé sur la valeur des expéditions peut occuper un autre rang si l'on utilise d'autres critères, comme la valeur ajoutée, le nombre d'employés ou les traitements et salaires versés.

Malgré ces limitations le tableau peut servir à indiquer en gros l'importance relative des différentes municipalités et donne, en une plus grande étendue, des renseignements comparables à ceux des rapports précédents.

Tableau 6. Comtés ou divisions de recensement, par municipalité

Depuis 1965, ce tableau a été modifié par rapport aux éditions précédentes, en ce que la distinction entre les municipalités urbaines et rurales a été éliminée (voir à la page vii de l'introduction).

Les données pour les sièges sociaux, bureaux de vente, etc. et pour l'ensemble de la province figurent à la fin de chaque section provinciale du tableau.

En dernier lieu, dans chaque comté ou division de recensement, la plupart des municipalités ne sont pas classées par ordre alphabétique.

Tableau 7. Comtés ou divisions de recensement, par groupe d'industries et par industrie

Ce tableau est le plus complet de la présente publication; il donne le détail des groupes d'industries et des industries, de même que le total cumulatif de chaque comté ou division de recensement dans la mesure où il est publishable en vertu des dispositions de la Loi sur la statistique relatives au secret.

Tableau 8. Zones métropolitaines de recensement, par groupe d'industries et par industrie

A partir de 1966, on a classé les cités de Regina et de Saskatoon comme zones métropolitaines de recensement; elles figurent donc au Tableau 8.

On réunit les données sur les zones métropolitaines de recensement d'après les limites fixées en 1966, qui toutefois demeurent pratiquement inchangées par rapport à celles de 1961.

Les 18 zones métropolitaines de recensement au Canada pour lesquelles on peut publier les données sont classées par ordre alphabétique.

Tableau 9. Municipalités dont les expéditions de marchandises de propre fabrication atteignent ou dépassent dix millions de dollars, par province, par groupe d'industries et par industrie

Comme il est expliqué à la page vii de l'introduction, ce tableau comprend toutes les municipalités publishables, classées par ordre alphabétique pour chaque province, et dont les expéditions de marchandises de propre fabrication atteignent ou dépassent dix millions de dollars, nonobstant leur statut juridique.

Les cités faisant partie des zones métropolitaines de recensement y figurent aussi; toutefois, afin de permettre la publication du plus grand nombre possible de renseignements sur chacune des industries des zones métropolitaines de recensement, on s'est abstenu de donner des renseignements détaillés par groupe d'industries dans chacune des cités formant les zones métropolitaines de recensement. On a cependant donné des détails sur les industries et sur les groupes d'industries dans le cas des autres cités, quand cela a été possible.

Tables 10, 11 and 12. Employment and Payroll of Head Offices, Sales Offices and Auxiliary Units

See the "Introduction" for an explanation of the statistical treatment of head offices, sales offices and auxiliary units. Employment and payroll data for these are of interest both in their own right and as components of total employment and payroll in the manufacturing industries. For example, if one is interested in obtaining data on total employment and payroll in the manufacturing industries in a given city, it is necessary to add the relevant data in Table 12 to those shown for that municipality in Tables 4, 5 or 6 which relate to establishments only. Other financial data for head offices, sales offices, etc., are shown, at the provincial level, in Table 6.

Tables 13 and 14. Selected Principal Statistics Stratified by Total Employed per Establishment, by Census Metropolitan Area, and Specified Municipalities

The inclusion of these tables, together with Tables 15 and 16, makes it possible not only to analyse the relative magnitude of certain industries and industry groups in Canada's larger urban centres, but also to examine the relative importance of establishments of a given size range within urban centres.

Tables 15 and 16. Selected Principal Statistics Stratified by Value of Shipments of Goods of Own Manufacture per Establishment, by Census Metropolitan Area, and Specified Municipalities

Comments given for Tables 13 and 14 are also applicable for Tables 15 and 16.

Note: The following abbreviations are used in this report:

c. city.
t. - v. town.
vl. village.
bor. borough.
D.M. - M.D. district municipality.

twp. - cant. township.

Tableaux 10, 11 et 12. Personnel et paie des sièges sociaux, des bureaux de vente et des unités auxiliaires

Le traitement statistique des sièges sociaux, bureaux de vente et unités auxiliaires est expliqué dans l'introduction. Les données concernant l'emploi et les rémunérations en question sont intéressantes en elle-mêmes, ainsi que dans la mesure où elles constituent une composante de l'ensemble des renseignements qui concernent l'emploi et les rémunérations dans les industries manufacturières. Par exemple pour obtenir des renseignements sur le nombre total des employés et le montant global des rémunérations dans les industries manufacturières d'une cité donnée, on additionne les chiffres du Tableau 12 à ceux qui sont indiqués pour la municipalité en question aux Tableaux 4, 5 et 6 n'ayant trait qu'aux établissements mêmes. Les autres données financières concernant les sièges sociaux, les bureaux de vente, etc., au niveau provincial, figurent au Tableau 6.

Tableaux 13 et 14. Certaines statistiques principales classées suivant le nombre total de personnes occupées par établissement, par zone métropolitaine de recensement, et certaines municipalités

Avec l'inclusion de ces tableaux, ainsi que des Tableaux 15 et 16, il est désormais possible non seulement de déterminer l'importance relative de certaines industries et de certains groupes d'industries dans les plus grands centres urbains du Canada, mais encore d'étudier l'importance relative des établissements appartenant à un groupe de taille donné à l'intérieur des centres urbains.

Tableaux 15 et 16. Certaines statistiques principales classées suivant la valeur des expéditions de marchandises de propre fabrication par établissement, par région métropolitaine de recensement, et certaines municipalités

Les observations relatives aux Tableaux 13 et 14 restent valables pour les Tableaux 15 et 16.

Nota: Les abréviations suivantes sont employées dans le présent rapport:

c. cité.

Map of Distribution of Manufacturing
Activity by County or Census
Division, Canada, 1967

The map on the facing page shows the value added by manufacturing activity in Canada for 1967, distributed by county or census division. Those counties or census divisions not containing a colored circle have a value added of less than \$5,000,000 while the area of the circle shown in the others is proportional to the value added.

The location of the Census Metropolitan Areas is shown by shaded areas, but colored circles centered on these relate to the value added of counties or census divisions and not of the Census Metropolitan Areas.

Map of Change in Manufacturing Activity
by County or Census Division,
Canada, 1962-1967

This map shows the percentage change for the 1962-1967 period of value added by manufacturing activity, by county or census division.

In general, the darker the shading of a county, or census division, the higher the percentage increase, while the lightest of the seven gradations in shading indicates a decrease in value added by manufacturing activity for the 1962-1967 period.

Index Map of Census Divisions
and Counties

The last of the fold-out maps shows the location and identification of provinces and census divisions or counties. The provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario are subdivided into counties which are listed in alphabetical sequence at the bottom of the map. The other five provinces are subdivided into numbered census divisions.

A complete set of maps showing location of census divisions and counties, subdivisions of census divisions and counties, and constituent municipalities of Census Metropolitan Areas and Census Major Urban Areas, has been published in the report "1966 Census of Canada, Reference Maps" (Catalogue No. 92-616), available from Publications Distribution, Dominion Bureau of Statistics, for \$1.00.

Carte sur la répartition de l'activité
manufacturière, par comté ou division
de recensement, Canada 1967

La carte ci-contre indique la valeur ajoutée par l'activité manufacturière au Canada en 1967, distribuée par comté ou division de recensement. Les comtés ou divisions de recensement qui ne renferment pas de cercle de couleur ont une valeur ajoutée de moins de \$5,000,000; la surface du cercle dans les autres cas est proportionnelle à la valeur ajoutée.

Les aires ombrées représentent les zones métropolitaines de recensement, mais les cercles de couleur centrés dans ces aires représentent la valeur ajoutée des divisions de recensement ou des comtés, et non des zones métropolitaines de recensement.

Carte sur la variation de l'activité manufac-
turière, par comté ou division de
recensement, Canada, 1962-1967

Cette carte indique la variation en pourcentage de la valeur ajoutée par l'activité manufacturière au cours de la période 1962-1967, par comté ou division de recensement.

D'une manière générale, plus le grisé est foncé, plus le taux d'accroissement est élevé, alors que la plus claire des sept teintes indique que la valeur ajoutée par l'activité manufacturière a diminué au cours de la période 1962-1967.

Carte-index des divisions de recensement et
comtés

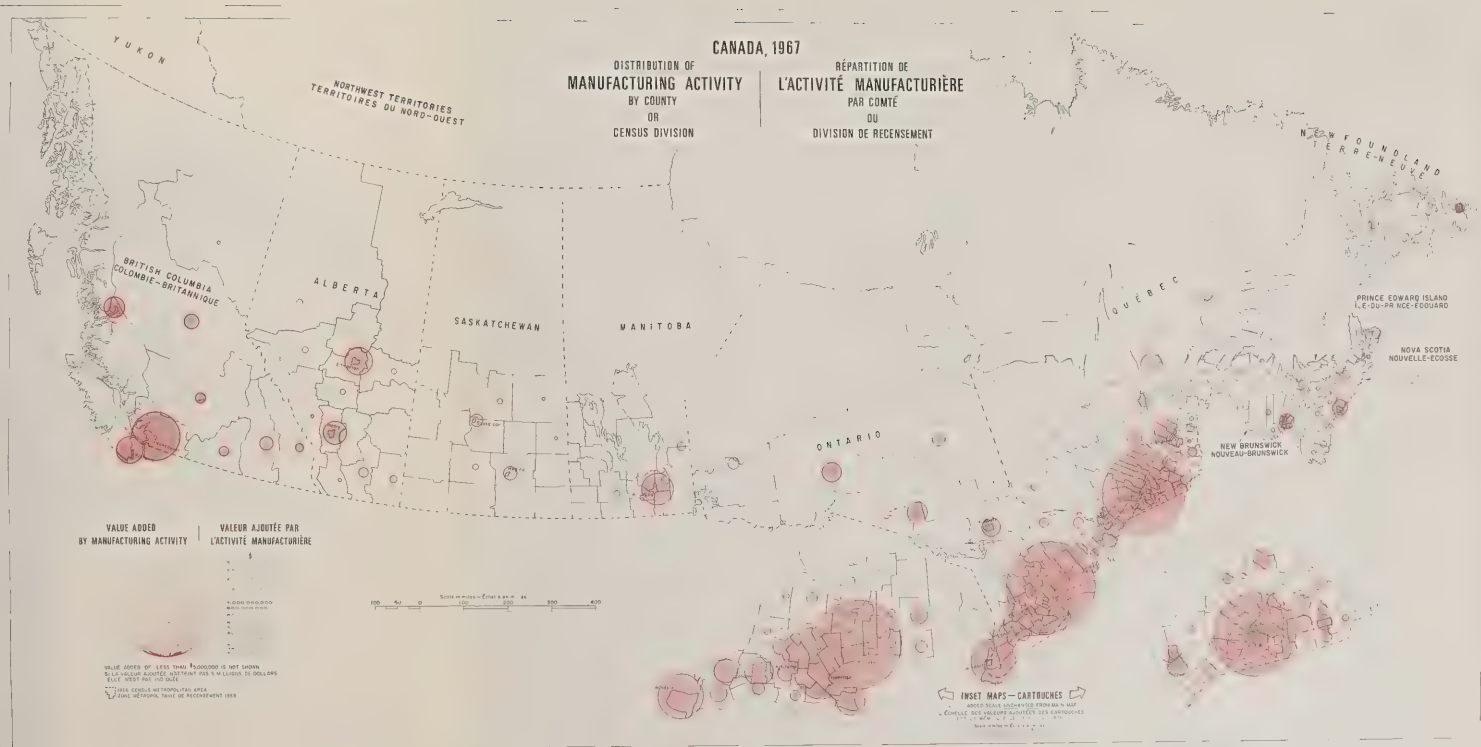

Le dernier dépliant indique l'emplacement et le nom des provinces et des divisions de recensement ou des comtés dans chaque province. L'Île-du-Prince-Édouard, la Nouvelle-Écosse, le Nouveau-Brunswick, le Québec et l'Ontario sont subdivisés en comtés, dont la liste alphabétique figure au bas de la carte. Les cinq autres provinces sont subdivisées en divisions de recensement numérotées.

On a publié un ensemble complet de cartes délimitant les divisions de recensement et les comtés, et les subdivisions des divisions de recensement et des comtés, de même que les municipalités comprises dans chacune des zones métropolitaines de recensement et des grandes agglomérations urbaines de recensement. Il a pour titre "Recensement du Canada 1966, Cartes de référence" (numéro de catalogue 92-616) et on peut se le procurer à la Distribution des publications, Bureau fédéral de la statistique, au prix de \$1.00.

(1) For principal changes in classification, concept and coverage during the 1917-1961 period, see footnotes to Tables 1 and 20 in the 1961 issue of Catalogue No. 31-201, "General Review of the Manufacturing Industries of Canada". -- Voir aux renvois des Tableaux 1 et 20 de l'édition de 1961 de la publication n° 31-201, intitulée "General Review of the Manufacturing Industries of Canada", les principales modifications apportées à la classification au concept et à la couverture entre 1917 et 1961.

(2) Prior to 1952, the basis of collection was gross value of products. -- Avant 1952, la collecte était fondée sur la valeur brute des produits.

(3) Beginning with the second set of 1961 data shown, some statistics are compiled for "Manufacturing activity" and others for "Total activity". "Total activity" includes non-manufacturing activities of manufacturing establishments and activities of separate head offices, sales offices and auxiliary units. "Total employees" and "Salaries and wages" in the revised 1961 and subsequent data are thus not comparable with earlier statistics under the same headings. -- À compter de la deuxième série de données pour 1961, certaines données statistiques sont calculées pour l'"activité manufacturière" et d'autres pour l'"activité totale". L'"activité totale" comprend les activités non manufacturières des établissements manufacturiers et celles des sièges sociaux, des bureaux de vente et des unités auxiliaires séparés. Les données rectifiées de 1961 et celles des années subséquentes sous les entêtes "Total, employés" et "Traitements et salaires" ne sont donc pas comparables à celles qui figuraient précédemment sous les mêmes entêtes.

(4) These 1961 data embody revisions or classification changes introduced since issuance of the 1961 data shown first above. For descriptions of these changes, see the 1962 and 1964 issues of Catalogue No. 31-203, "Manufacturing Industries of Canada: Section A, Summary for Canada". -- Ces données pour 1961 résultent des rectifications et des changements de classification apportés depuis la parution des données de 1961 qui figurent les premières. Voir aux éditions de 1962 et 1964 de la publication n° 31-203, intitulée "Industrie manufacturière du Canada: Section A, Sommaire", la description de ces modifications.

(1) For principal changes in classification, concept and coverage during the 1917-1961 period, see footnotes to Tables 1 and 20 in the 1961 issue of Catalogue No. 31-201, "General Review of the Manufacturing Industries of Canada". -- Voir aux renvois des Tableaux 1 et 20 de l'édition de 1961 de la publication no 31-201, intitulée "General Review of the Manufacturing Industries of Canada", les principales modifications apportées à la classification, au concept et à la couverture entre 1917 et 1961. (2) Prior to 1952, the basis of collection was gross value of products. -- Avant 1952, la collecte était fondée sur la valeur brute des produits. (3) Beginning with the second set of 1961 data shown, some statistics are compiled for "Manufacturing activity" and others for "Total activity". "Total activity" includes non-manufacturing activities of manufacturing establishments and activities of separate head offices, sales offices and auxiliary units. "Total employees" and "Salaries and wages" in the revised 1961 and subsequent data are thus not comparable with earlier statistics under "Total activity". "Total activity" comprend les activités non manufacturières des établissements manufacturiers et d'autres pour l'activité totale. Les données rectifiées de 1961 et celles des années subséquentes sont calculées pour l'activité manufacturière et d'autres pour l'activité totale. (4) These 1961 data embody revisions or classification changes introduced since issuance of the 1961 data shown first above. For descriptions of these changes, see the 1962 and 1964 issues of Catalogue No. 31-203, "Manufacturing Industries of Canada: Section A, Summary for Canada". -- Ces données pour 1961 résultent des rectifications et des changements de classification introduits depuis la parution des données de 1961 qui figurent les premières. Voir aux éditions de 1962 et 1964 de la publication no 31-203, intitulée "Industries manufacturières du Canada: Section A, Sommaire", la description de ces modifications.
